

Street and track part of RS-17

Overhead picture shows the route through the industrial estate in Hafnarfjörður from start until you reach the KK drag and race track:

Please refer to the next page for a description of driving around the KK drag and race track should be done.

Street and track part of RS-17

When you pass the yellow gate indicated by line 11 on page 207 keep to the right as you continue. When passing the club house, keep the cones to your right all the way into the pit area.

Drive straight between to the pit exit markers which are orange and white cones. Join the track as indicated by the white lines on exit from the pit.

When you enter the chicanes take a straight line cutting the corners. At the end of the chicanes at the right bend keep to the right side of the track all the way to when you join the drag strip. Drive between the cones and then keep to the left hand track boundary (the white line on the left hand side of the track).

Exit the track by following the cones after the large bend – the cones will be on your left hand side.

Go past the end of the building passing a large truck before exiting to the access road to the left.
